Application/Control Number: 09/998,933

Art Unit: 3711

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6, 14, 15, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tiitola et al. '195 (Tiitola) in view of Salminen. Tiitola discloses a blade of the construct claimed. Tiitola does not disclose the claimed fastening means (shank portion). However, such a fastening means is known in the art as disclosed by Salminen. It would have been obvious to one of ordinary skill in the art to have used such a shank portion to fasten Tiitola's blade as well if it was desired to securely fasten it to a wooden stick.

Claims 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 6 above, and further in view of Quigley. As disclosed by Quigley the inner and outer layers of such blades may be formed of one or more layers as desired and the inner and outer layers need not be symetrical. In view of Quigley's teaching it would have been obvious to one of ordinary skill in the art to have also have formed Tiitola's inner and outer layers of one or more layers as desired (thus allowing for various different thicknesses) to tailor the specific performance characteristics of the blade as taught by Quigley.

Salminen, Dumont, Franck et al., Buchting et al., Adachi, McKinnon et al., and Hasegawa have been cited for interest because they disclose similar blades.

Application/Control Number: 09/998,933

Art Unit: 3711
